Ideas That Changed The World

Synopsis

Ideas that Changed the World combines the quality and breadth of a modern design museum with the high standards of a DK reference title. Stunning photography and beautifully written stories work together to give the reader a unique experience. We don't just show you what's ground-breaking about a space suit, we explain its place in history and space exploration, and the other inventions it has influenced. Readers will be struck with wonder by each item and sense the excitement that so many discoveries inspire. Each subject is introduced through text and a close-up photograph.

Captivating icons lead the reader further into the story behind the object and then on to a collections spread featuring similar inventions and developments that shaped the design before and afterward. Some of the incredible inventions and ideas featured are: microscope (Charles Darwin's), telescope (Isaac Newton's), antibiotics, elevators, eyeglasses, the bicycle, auto pilot, the blackboard (as used by Albert Einstein), tin cans, umbrellas, buttons, TV, satellites, submarines, Captain Cook's travel cooking implements, the wheel, cement, a volcanologist's heat-proof uniform, the first Roman coin, bar codes, the first video game, the Walkman, the first Apple computer, surf boards, film animation, and much, much more!

Book Information

Lexile Measure: IG1110L (What's this?)

Hardcover: 256 pages

Publisher: DK Publishing; 15363rd edition (August 16, 2010)

Language: English

ISBN-10: 0756665310

ISBN-13: 978-0756665319

Product Dimensions: 8.9 x 1 x 11.2 inches

Shipping Weight: 2.8 pounds

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #1,125,750 in Books (See Top 100 in Books) #121 in Books > Children's Books > Education & Reference > Science Studies > Electricity & Electronics #242 in Books > Children's Books > Science, Nature & How It Works > Inventions & Inventors

Age Range: 10 - 17 years

Grade Level: 5 - 12

Customer Reviews

Approximately 83 inventions are beautifully highlighted in this oversize reference volume. The

majority of the attractive, photo-laden pages are designed with a large close-up photo surrounded by many smaller current and archival photos, with pockets of information sprinkled about. The focus is on the invention and how it has changed lives, rather than the inventor; however, some notables, such as Elisha Otis, Henry Ford, and Jacques Cousteau, are given double-page spreads. The inventions are grouped into six categories, although the groupings seem random. For example, "Money," "Credit Cards," "Bar Codes," and "Stamps" are placed with "Handy Gadgets." A time line at the end gives the sequence in which the inventions came about. They range from the wheel (circa 3500 BCE) to the all-electric car (2008). Of limited use for in-depth research, but perfect for browsing and inspiring. Grades 7-10. --Randall Enos

Named to the 2010 VOYA Nonfiction Honor List

My daughter absolutely loved this book when she checked it out from the local library, so I got her a copy of her own. She tells me lots of cool inventions and how they came to be. If you have a child who likes stuff like that (inventions, science, engineering, etc.), then she is sure to enjoy this book as a reference or just to browse through.

This book is great. The kids read about something and then can't wait to tell you about what they read. Then I learn something too.
