Have you ever browsed through a family photo collection and seen photos of a boy taken over the course of many years, from babyhood through to young manhood? If you have, youâ€“ll know that boys donâ€“t grow up in a smooth way. They go in surgesâ€“ looking the same for a year or two, then suddenly seeming to change overnight. And thatâ€“s only on the outside. On the inside, great changes are happening, too. But developing maturity and character arenâ€“t as automatic as physical growing. A boy can get stuck. Everyone knows at least one man who is large in body but small in mind or soul. He just hasnâ€“t developed as a mature person. Such men are everywhereâ€“ they might be rich, powerful, a president, or a tycoon, but you look at them and think, Yep, still a boy. And not a very nice one.Â  Â  Â  Â  Â  Boys donâ€“t grow up well if you donâ€“t help them. You canâ€“t just shovel in cereal, provide clean T-shirts, and expect him to one day wake up as a man! You need to follow a certain program. The trick is to understand what is neededâ€“ and when.Â  Â  Â  Â  Â  Luckily, boys have been around for a very long time. Every society in the world has encountered the challenge of raising boys and has come up with solutions. The three stages of boyhood are timeless and universal. Native Americans, the San tribe of the Kalahari, Australian Aboriginesâ€“ all knew about these stages. We know them from scienceâ€“ hormone studies and brain imaging. And from observationâ€“ whenever I talk about these stages with parents, they say, Â€“Thatâ€“s right!â€“ because the stages match their experience. They just hadnâ€“t thought about it before. Here are the stages at a glance: 1. The first stage of boyhood is from birth to sixâ€“ the span of time when the boy primarily belongs to his mother. He is Â€“herÂ€“ boy, even though his father may play a very big role, too. The aim at this age is to give strong love and security, and to Â€“switch a boy onÂ€“ to life as a warm and welcoming experience. 2. The second stage includes the years from six to fourteenâ€“ when the boy, out of his own internal drives, starts wanting to learn to be a man, and looks more and more to his father for interest and activity. (Though his mother remains very involved, and the wider world is beckoning, too.) The purpose of this stage is to build competence and skill while developing kindness and playfulness, tooÂ€“ becoming a balanced person. This is the age when a boy becomes happy and secure about being male. 3. Finally, the years from fourteen to adultâ€“ when the boy needs input from male mentors if he is to complete the journey into being fully grown up. Mom and Dad step back a little, but they must organize some good mentors in their sonâ€“s life or he will have to rely on an ill-equipped peer group for his sense of self. The aim is for your son to learn skills, responsibility, and self-respect by joining more and more with the adult community. Please note: These stages do not indicate a sudden or sharp

shift from one parent to another. It's not like there's the mom stage, then the dad stage, and then the mentor stage. For instance, an involved dad can do a huge amount from birth onward, or even take the role a mother usually has if need be. And a mother doesn't quit when a boy reaches six. Quite the opposite. The stages indicate a shift of emphasis: that the father comes to the fore more from six through fourteen, and the importance of mentors increases from fourteen onward. In a sense, it's about adding on the new ingredients at each stage. The three stages help us know what to do. For example, it's clear that fathers of boys from six to fourteen must not be busy workaholics or absent themselves emotionally or physically from the family. If they do, this will certainly damage their boys. (Yet most fathers of the twentieth century did just that—as many of us remember from our own childhoods.) The stages tell us that we need to bring in extra help from the community when our sons are in their mid-teens—the role that family members (uncles and grandfathers) or the tradesman-apprentice relationship used to take. Too often, teenagers move outward into the big world but no one is there to catch them, and they spend their teens and early adulthood in a dangerous halfway stage with only peers to depend on. It's probable that many problems with boys' behavior—poor school motivation, depression, and getting into strife with the law (drunk driving, fighting, crime, and so on)—develop because we haven't known about these stages and haven't provided the right human ingredients at the right times. The stages are so important that we must look at them in more detail and decide how to respond. That's what we'll do now.

This book is one of the best books I have read. First, I read it Japanese edition, "父の育児" (Fujisawa, 2002). I bought English edition for my husband. We don't have a daughter but I borrowed his book, "raising girls" from the library.

Very interesting read for mom of twin boys and how they can be wired differently and what it means to raise them.

I purchased raising girls from a local book store and loved the info, and now that my son is 3, I've enjoyed what this book has had to offer :)

I read a long time ago and had forgotten how useful this book is. Reconnecting with it for a teenager is great.

This is a very good book, it has help me understand a lot about why and what is going on with my boy, to prepare my self and him for the next steps in his life, conscious of what I'm doing and not just " hoping that I'm doing the right thing"

A Must Read, before your child is born ! It would help mothers and fathers prepare so much better. I was particularly thrilled with all the sections that dealt with school-related issues.

A great book for parents of boys. Warm and humorously written, full of great advice and interesting stories. I would highly recommend this book.

Looking for something to get a little perspective on raising my son. I have found it helpful on a couple of issues.
