Marvin Bittinger has been teaching math at the university level for more than thirty-eight years. Since 1968, he has been employed at Indiana University Purdue University Indianapolis, and is now professor emeritus of mathematics education. Professor Bittinger has authored over 190 publications on topics ranging from basic mathematics to algebra and trigonometry to applied calculus. He received his BA in mathematics from Manchester College and his PhD in mathematics education from Purdue University. Special honors include Distinguished Visiting Professor at the United States Air Force Academy and his election to the Manchester College Board of Trustees from 1992 to 1999. Professor Bittinger has also had the privilege of speaking at many mathematics conventions, most recently giving a lecture entitled "Baseball and Mathematics." His hobbies include hiking in Utah, baseball, golf, and bowling. In addition, he also has an interest in philosophy and theology, in particular, apologetics. Professor Bittinger currently lives in Carmel, Indiana, with his wife Elaine. He has two grown and married sons, Lowell and Chris, and four granddaughters. David Ellenbogen has taught math at the college level for nearly 30 years, spending most of that time in the Massachusetts and Vermont community college systems, where he has served on both curriculum and developmental math committees. He has taught at St. Michael's College

and The University of Vermont. Professor Ellenbogen has been active in the American Mathematical Association of Two Year Colleges (AMATYC) since 1985, having served on its Developmental Mathematics Committee and as a delegate. He has been a member of the Mathematical Association of America (MAA) since 1979. He has authored dozens of texts on topics ranging from prealgebra to calculus and has delivered lectures on the use of language in mathematics. Professor Ellenbogen received his bachelor's degree in mathematics from Bates College and his master's degree in community college mathematics education from The University of Massachusetts-Amherst. In his spare time, he enjoys playing piano, biking, hiking, skiing and volunteer work. He currently serves on the boards of the Vermont Sierra Club and the Vermont Bicycle Pedestrian Coalition. He has two sons, Monroe and Zachary. Barbara Johnson has a BS in mathematics from Bob Jones University and a MS in math from Clemson University. She has taught high school and college math for 25 years, and enjoys the challenge of helping each student grow in appreciation for and understanding of mathematics. As a Purdue Master Gardener, she also enjoys helping others learn gardening skills. Believing that the best teacher is always learning, she recently earned a black belt in karate.

This is the answer portion of a two book set plus an online MML site that compiles a portion this piece of education if you choose to rent or purchase the spiral version of the authors' series of books to complete this course. The price of the text is a little pricey but then maybe not when you consider you are getting two classes worth of teaching for the price of one. From that point of view this is a pretty cheap text and workbook combo. You can rent a spiral bound that requires you to get info from the MML site which you find you have no access code for. Ratings state the company willing to refund but if you ordered this manual of answers and you need the book, may I suggest you do not rent or buy the spiral edition. Look for a used book in good enough condition to get you through the courses and be done with it!

Book arrived in great condition. Caution - make sure you check with your instructor prior to purchasing. We were told it was a mandatory book during registration and discovered on the first day of class neither of the "required" books were going to be utilized. Now we have to purchase a separate type of learning device....sigh!

The book that I bought did not contain chapter exercises for that I can practice. I was given the option of buying either the hardcover, paperback, or spiral bound version of the book. I bought the

spiral bound, but the description did not mention that the spiral bound version was not identical to the other versions. I was extremely frustrated and disappointed because the chapter exercises are what I need to do well in the course I am taking. I seek to return this book to its previous owner.

i rented this book and it was perfect for what I needed. The school wanted an outrageous amount of money for a new book and I payed 1/4 of the price. It was awesome. If I can get away with renting books I will rent from .

Bought for someone who required it for their class. The book came in perfect condition and the content was very useful in their class.

This book is great! I'm 46 & this book really helped me re-learn pre-algebra. Of course, I had an excellent teacher (thank you, Taya!), but she chose course materials very well! This book helps to thoroughly explain concepts & solutions!

Very well written, easy to follow.

Clean book, quick delivery
