# Ireland's Lighthouses: A Photo Essay

## Synopsis

Lighthouses have played an important role on Ireland's extensive and dramatic coastline since the fifth century, lighting the way for many a cargo and passenger ship while ensuring that those who made their living on the sea made it home safely. During a project that lasted over ten years, John Eagle made several daring boat and helicopter trips to capture unique images of these wind-swept, wave-lashed buildings. This book brings together these striking photographs with informative text on their details, locations, and how to find them. Ireland's Lighthouses is sure to delight all those fascinated by these isolated guardians of the coast. "[A] splendid volume." Irish Echo

John Eagle lives on the Beara Peninsula in West Cork. He was born and raised in Oxford, and studied photography. Circumstances led to his mother buying a house in Eyeries in West Cork. He came to stay with her, and liked it so much he decided to live there in 1991. His work sells around the world and the Irish Landmark Trust, which has acquired unused lighthouse buildings, also commissioned work from him. Flying in helicopters has been part of the thrill, he admits.

This is the most complete book on Irish lighthouses I have ever come across. Every lighthouse in Ireland, detailed information on how to get there, how to see it, how to make sure you cannot miss it. The back story to each lighthouse is fascinating and give the reader so much more than just the pictures and directions. Makes me long to return to the Emerald Isle to visit some lesser known lighthouses.

we are planning a trip to Ireland next year and it has a map of where each lighthouse is, if it is excessable, and directions,ans well as lovely pictures and lots more info.

I am very hopeful that this book will guide me to some of the lighthouses in Ireland. I'll know more after I return from Ireland.
