Bought this for my 7 year old grandson. He read it immediately and liked it a great deal. It contained just enough information for someone his age to absorb. Very good informational book for young readers.

:)

This was easy for my students to comprehend and held their interest. We had some discussion about man going to the moon before reading this book. It is a high interest low level book and easy to understand.

Your space-fan kid will absolutely love this book. Its great for the 1st to at least 3rd grade age range. It will teach them a lot about the journey to the moon.

my son really liked this book with the historical detail and space story. Good message for kids - never quit (book tells about how many attempts it took to successfully get to the moon)

Book is perfect and super fast delivery.

Great book my 8 year old is at a low level reading and and this defiantly helps him feel more at his age level without being overwhelming

Great books for kids 6-7 and older who are interested by the 1st time on the moon. It is a non fiction book with some real pictures/photos and some realistic pictures. It is very informative yet easy to read and understand for young readers. If they like spacecraft stories and the 1st moon walk I am pretty sure that they will love it.
