This book was perfectly adequate for what was needed for the course I am taking. It provided me the information to complete my assignments and understand the curriculum. I did not think that the price and the book really made sense. It was extremely pricey considering the year the book was published, the size, etc. Overall, if you have to have this book, was the cheapest place I was able to find it.

for a class

The most positive thing I can say is that getting this book here saved me many dollars verses buying it at the University's bookstore. Hey, it's a textbook, it's overpriced as all textbooks are. For the amount of money you spend on this book you think they could have at least used some color. Nope, it's all black and white. It covers the material needed for the class. If you need it for the class, you need it for the class. It will be a good day when the physical textbook becomes a thing of the past and instead of carrying around a huge backpack full of overpriced books, students will carry around one iPad, or Kindle, or whatever ereader they like and have all of the inexpensive, downloaded textbooks stored in it.

Informative and well written. Wish I could have bought it instead of renting it. Needed it for college but would have made for a good read (if you like learning about psychology and the study of personality)

The biographical sketches that open each chapter really help to frame the theories. It's really enlightening. I've got maybe 15 books on personality sitting around the house but this one stands out as one of my favorite.

I needed this book for a class in college. This book provided great theories and research to substantiate each personality represented. I passed the class because of the lay out of this book.

This book is very thorough and describes each theorist without bouncing around to the point of confusion. I was able to really learn about each one and how they influenced each other. I will be keeping this book for future reference.

Great textbook, not the greatest of quality of received item condition. The book was colored in with highlighter, pen, and pencil. Binding was detached.
