Grade Level: 2 - 5

Customer Reviews

Gr. 4[^]-7, younger for use with an adult. The reader will find this attractive book useful for reports or, as the Take Along Guide series title implies, as a nature guide. Each page is devoted to one plant and its fruit. After a brief introduction to berries, nuts, and seeds as the fruit of a plant, Burns looks at specific fruit, one to a page, including raspberries, acorns, pecans, juniper berries, cattails, and thistle blossoms. The format is crisp, and the writing clear; each page features lovely watercolor pictures of the fruit and the plant or tree it comes from and information about what it looks like, where to find it, and who eats it. Interesting activities such as planting a seed garden and making berry watercolors round out a very nice treatment. Ilene Cooper

Love! Love! Love! This series!!'m getting them all if that tells you anything. These pack a lot of info

in a fun unique way. My kids carry them everywhere and have started really "Investigating". I have a lot of nature books but this series is my favorite so far. My children are 5 years apart and it works just as well for both of them while making me happy with real facts.

I bought this book because I do not know very much about plants, but would like to learn everything I can. Obviously a quick read for me, but I learned some things I didn't know and confirmed some things that I already did.

Will take this book into the woods with me and my younger friends to look for these items. Thank you for offering this fine item.

We love this book. Our 5 year old is very engaged by it. Great choice for teaching the berries, nuts and seeds in our area.

The kids loved these and are great for their scout bags

My 9 year old son loves these books!

Very detailed book. Lots of information.

great
