Customer Reviews

Thank you - helped prep for SAT.

I purchased the College Panda's SAT Math, Writing & Math Practice exam book for my daughter to study and improve her SAT score from a 1200 to atleast a 1400+++...My daughter found this book to be very resourceful and great in explaining the problems... Easy to follow and organized helping her to focus on her problem areas.

This book looks so AMAZING and PROFESSIONAL! It looks like the real SAT Math section and includes answers and categories for said answers so you can figure out what needs to be worked on.

Mr. Phu has done a great job emulating the format of the actual SAT Math Sections and writing realistic practice questions. This is an excellent product to purchase.

Solid book, but hard to say 10 tests with minimal explanations is going to help people adequately prepare for the SAT. Nielson's advanced workbook is great for those looking for 700+. This author does have an advanced workbook that you should be buying in conjunction with this one. But if you are in any way looking to save dollars, you can acquire 7 SAT math tests from the college boards website, plus with a little digging you can access the older SATs as well. By far the biggest value in the categories of every question in this book. Take the first three tests. Identifying the questions you had to guess on and you have 7 more tests with those categories covered.

Helpful for SAT prep; I would definitely recommend this as a good resource for anyone trying to self-study.

This book contains questions similar to the questions provided by the real test makers in SAT Tests.

Great Practice! Covers all topics/questions on Sat, and helps reduce mistakes. Def Recommend
