# Architectural Woodwork Standards

## Synopsis

This first edition of The Architectural Woodwork Standards is a definitive reference manual designed to simplify and clarify guidelines, information and principles required for fabrication, finishing and installation of architectural woodwork. It provides design professionals with a logical and facile means to comprehensively specify woodwork elements. The AWS includes compliance criteria to ensure that all millwork manufacturers are competing equally when bidding on projects and they are obligated to perform work of equal quality. The Standards, as in both previous publications, encompass three grades of quality: Economy, Custom and Premium. The AWS also includes a comprehensive glossary of terms. Any AWS errors and their corrections will be updated on the AWS Errata webpage on an as needed basis. All users of the new AWS are encouraged to check errata prior to beginning the specification of any new project.

Is what it is. I'm an Architect and most Architects need this book for commercial mill-work specs.

Fantastic book!! Great to use as a reference in millwork callouts in construction documents!! I would highly recommend it to those that produce construction documents that require millwork elevations and details.

Im sure this is a helpful book for 20+ shops, that deal mostly with large scale commercial work, but I found the book hard to read and containing little value for the custom kitchens I build. There are very few pictures and drawings, lots of over lapping context about ( what i consider ) obscure material i.e. particle board, melamine, and other laminates. I bought the book hoping I could learn more about the standards for cabinet construction, such as size, dado details, material choses ect. I didn't find it helpful for that. But thats just me.....

Needed an updated manual for work and this was a great buy online. Purchased used but was in great shape and had everything I needed.

Great source & service.

The new standard, so a requirement for architectural firms. Useful information in the new format and organization.
