David Holter is a trained orthopedic mechanic and has years of experience working with leather.

Peter Fronteddu has established himself as a knife expert. He has written and photographed several volumes in this workshop series.

This is perhaps one of the best books on leather work that I have seen so far. I own about a dozens of books and all fall short of this one. The instructions are clear (finally one book with detailed color photographs, step by steps). It goes from the design part to all the finishing touches. This book is just great, not only for knife sheaths but I will use it also for making sheaths of my leather tools. I just wish all the books has color photos (we are in the XXI century and there are still B&W books out there) with detailed steps by steps. Awesome book. I will follow these authors to see what else is out there.

This book is well-illustrated and written. The directions are clear and simple, and the techniques shown are useful and thorough. Many of the instructions can be used to make other styles of sheath as well.

This is a very well done book with designs for 4 quiver sheaths for knives. The authors provide methods for making custom fitting sheaths with good illustrations. Overall a real nice book with good instruction. Looking forward to volume II

This is a great book if you're just starting out. I actually read it to bring myself back to basics when I try to get too fancy and mess up my projects. The workflow of each project is spot on and avoids problems in later production.

this book is awesome, it gives you very good detailed color pics that go step by step if you get this there is no way you cant make a awesome sheath long as you have the right tools awesome I love this book

very good book. very technical. awesome pictures. I have already recommended this book to a friend. great projects to make inside.

Just what my husband was expecting. Thanks!

Great book thanks
