Mosby's Pharmacology Memory NoteCards: Visual, Mnemonic, And Memory Aids For Nurses, 2e

Synopsis

Perfect for mastering key pharmacology topics and drugs, MOSBY'S PHARMACOLOGY MEMORY NOTECARDS is a colorfully illustrated collection of spiral-bound cards with a variety of learning aids, illustrations, and mnemonics. With every topic from administration to the many types of drugs, these cards take a visual approach to help you master difficult pharmacology content for both nursing school and the NCLEX exam. UNIQUE! Includes 92 full-color illustrated mnemonics for individual drugs and difficult pharmacology concepts to help you remember even the most complex topics. What You Need to Know drug monographs on the back of each image include valuable information about each drug with drug classification, action, uses, contraindications, precautions, side effects, and nursing implications information. UNIQUE! Color highlights draw your attention to four central topics: serious/life-threatening implications, most frequent side effects, important nursing implications, and patient teaching. Spiral-bound at the top with substantial paper, these notecards are durable and portable. Added cards for cipro, penicillin, statins, analgesics, RhoGAM, uterine relaxants, and erectile dysfunction drugs give you an even more comprehensive, up-to-date study tool.

Customer Reviews

"This collection of memory notecards may be helpful to pre-registration students who need to memorise simple descriptions of different drugs. It's humorous colourful pictures will appeal to visual learners. The text is highlighted to denote important points. The notecards are sturdy and small

enough to carry in a pocket." Nursing Standard, October 2008

Somewhat helpful

I like these notecards, but if you don't have the money to spare then I wouldn't worry about it. Depending on which nursing school you go to, the important information they have on there may not include what you have to know. They sum up a lot of categories & don't differentiate as much as I'd like, but it adds some fun to your study time. Bottom line: If you're not worried about money, get them. If you don't have the money, don't worry about it. This won't help make or break your grade.

This is a very helpful note card. It has illustrations that makes the medications/drugs easy to remember. This note cards helped me a lot not only during my nursing school but up until now, I'm still using it at work. This is a must-have! I would recommend this product!

This is an extremely helpful resource for studying medications. As a nursing student I have tried many ways to retain information about all the drugs I have had to learn. This book has made it very easy by presenting pictures, mnemonics, and phrases to recall information. This is a small book that I keep in my backpack, it is a little to big to put into scrub pockets but it is mostly meant to be a study reference rather than an 'on the floor' quick reference. I would definitely recommend this to anyone who needs to learn and retain drug information.

Not only are these flash cards relevant for studying for exams but they are great for quizzes as well as handy quick info while doing your nursing rounds. They absolutely make all the complicated jargon in the textbooks make more sense. They cut it to the chase and just give you what you need to know. I loved using them all semester long and I'm sure I will be using them as nurse student as well as a full fledged RN..

I wasn't sure if I would like this, but it's awesome. Every med or med class has a mnemonic illustration on one side, so it's great for studying. The main points are covered for each med. I'm definitely using this to study for the NCLEX and I'm buying another one for my study buddy.

I keep this at my desk to reference. I can't wait to afford a newer version.

I used these notecards to study for NCLEX and passed with 75q. I am a visual learner, and it helped a lot. In the days that I was too tired of the boring books, I had fun with the silly cartoons on these notecards. It doesn't have all the meds you must know to pass the test. So, you need something else. I didn't give 5 stars because it should have more meds.
