Customer Reviews

I got this to use as a projector. I put my iPhone on one end and taped this to the other side of a box. The image it projects is awesome and pretty defined. Not what it's meant for, but cool nonetheless. Works great as magnifying glass too.

I was very disappointed that this does not magnify unless you hold it up and away from the page... Sadly I bought two and would not buy them again.

Won't focus sunlight to start an ember as a firestarter. OK for reading fine print and save you the price of reading glasses.

Leaves the page wavy

Works just like a Fresnel lens.

A great help.
