Good just as promised.

This atlas has nearly all the back roads in the state, labled by number (which is not always on the street sign). It does not have any detail in cities and large towns, just the main streets. But it has a great guide to things to do: parks and forests, some hiking trails, all the private campgrounds in the state, some bike routes, some canoe trips, lots of info on places to fish and hunt, tons of historic sites and museums of all kinds, civil war sites, gardens, wildlife viewing areas, unique natural features, some wineries, a few waterfalls, several senic drives, and even boat trips. A great guide

for exploring the state, though you will need a regular highway map as well.

A significant portion of the Civil War was fought on the soil of Virginia. As a result the state has a lot of battlefield parks that one can visit. That's certainly one of the attractions the state has for me. But I'm also attracted to the natural beauty of the state, especially the Blue Ridge and the Shenandoah Valley. I've been helped immeasurably in my exploration of the state by my Delorme Virginia Atlas and Gazetteer. I've been able to find my way to many of the battlefields, sometimes aided by shortcuts that weren't shown on a roadmap but are in the gazetteer. And I've been able to get off the beaten path and explore the byways and backroads of the Shenandoah Valley, absorbing the local flavor, and coming upon little hamlets and even country stores that I wouldn't have discovered otherwise. And as someone who likes to hike, having access to a map that shows trails and trailheads has been a real boon as well. Because this is a topographical map, I'm also able to anticipate in advance what sort of terrain I'll encounter. In every way this Virginia gazetteer is a real boon to exploration of the state.

It's Wednesday evening. You're trying to think of something new and different to do with you weekend. Your loved one(s) are bored and restless and want to do something different. It's all up to you... What to do...If you've been there before, there is one solution - this book of great maps. In addition to the detailed accuracy of the maps, there is a great section that details locations of interest, places to go, things to do, phone numbers you can call to make arrangements and get info. This could be the book that saves your weekend! Stored in your car, it could also be the book that get's you where you want to go without driving to a gas station to get directions. If you've tried that lately, you know that your chances of getting good directions to far-off places are slim to none. I have purchased several of these books - one for each state that I frequent. Whenever I want to get away, I take them out and see what I can find. We have visited covered bridges, homes built by Frank Lloyd Wright, cliffs and caves, museums and all kinds of historic landmarks. For the price of a nice meal, you will have a travel companion for many years to come. While you can get maps on the internet, most of us still don't have that at our disposal when we are on the road. This book will be your guide!
